REASONS FOR ALLOWANCE

1. Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art an active-matrix type liquid crystal display (LCD) device and a method of manufacturing the device thereof comprising a combination of various elements and steps as claimed, more specifically, the first dummy patterns have the same vertical structure as any one of the gate links and data links and are located in the same layer as the gate links and the data links, the first dummy patterns are spaced from the gate links by a substantially similar distance to cross entirely the sealant in a direction parallel to the gate links.

Nakahara ('470) discloses an active-matrix type LCD comprising dummy patterns parallel to the gate lines, a sealant on the gate lines. However, Nakahara fails to disclose the particular combination of the claimed invention: 'the first dummy patterns have the same vertical structure as any one of the gate links and data links and are located in the same layer as the gate links and the data links, the first dummy patterns are spaced from the gate links by a substantially similar distance to cross entirely the sealant in a direction parallel to the gate links'.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
